

Gamatronic is proud to present
The new cutting edge of UPS technology!

Introducing NEW Mega POWER+
25kVA-250kVA

True on-line double conversion topology

Modular and scalable

Protective N+1 redundancy

Extra small footprint

Green Power

Based on the winning technology of the original POWER+ modular UPS, the Mega POWER+, with increased capacity, offers you up to ten 25kVA advanced and improved modules, operating with a unity output power factor and providing you with true power confidence!

Gamatronic POWER+ & new MEGA POWER+

Modular UPS for Power-Smart Businesses

Now - cutting edge Gamatronic POWER+ systems supply you with up to ten 10kVA & 25kVA modules **For Maximum Power Control and Efficiency!**

MEGA POWER+ Simply Ingenious!	Conventional UPS	Gamatronic Modular UPS POWER+ and MEGA POWER+	Your Benefit
Extra High Efficiency	92% average	A Proven Ac/Ac efficiency of 96%! <ul style="list-style-type: none"> Cuts losses in half - from 8% to 4%! Reduces heat dissipation 	SAVE ON ENERGY COSTS: <ul style="list-style-type: none"> Up to \$4,000 per 100kVA (80kW) a year, less running costs! Substantially less cooling costs!
N+1 Redundancy	High cost redundancy options	N+1 - the most economical redundancy you can get, without over-sizing your system!	SAVE ON PRICE OF PURCHASE: Buy only what you really need! <ul style="list-style-type: none"> Get a minimum-size & minimum-cost modular system solution Keep your critical applications protected at all times!
Extra High Power Density	Only 200-400 VA/Kg 1.3-4 VA/inch ³ In average	An astounding density of - 1100VA/Kg 8.5VA/inch³	SAVE ON FLOOR & SHIPPING: <ul style="list-style-type: none"> Extra-light weight and Super-small footprint! Less delivery, off loading and positioning costs!
Green & Clean Power	THDi>5%, PF<0.8-0.96 UPS to generator power ratio of 2-3	Unity PF, THDi<5% UPS to generator power ratio of only 1.2!	SAVE ON INSTALLATION: <ul style="list-style-type: none"> No need for additional input filters or 12 pulse solutions! Reduced infrastructure costs Smaller generator
Customer Friendly Serviceability	Average MTTR of 30 min., and requires qualified engineer	Average MTTR is less than 5 minutes, and it is self serviceable with real hot swap modules	SAVE ON MAINTANANCE: <ul style="list-style-type: none"> Lower down time Reduced maintenance agreements costs!
Superior Topology	<ul style="list-style-type: none"> Line Interactive On-line with standby battery Delta conversion "Economy" mode 	True on-line double conversion with true on-line battery Full compliance with IEC-62040-3	GET PREMIUM SYSTEM RELIABILITY & THE BEST LONG-TERM POWER DEAL: No more load crashing - only Pure Power Confidence!
