www.tushkit.com, marketing@tushkit.com

**Tushkit** was established by a young dad who during his everyday baby-tasks encountered undesired operational difficulties and complexities. Determined to simplify these tasks, he developed the Tushkit Diaper Changer Manager.

**Tushkit** is an all in one foldable diaper changer manager, compact enough to fit on almost any surface, small enough to carry everywhere. It contains everything you need, including a smart diaper stacker that unfolds diapers automatically, elastic bands for bottles and tubes, and a strap-free baby-securing mechanism that grows with your baby!
